## SCIENCE

### Rocks

Pupils should be taught to:

- compare and group together different kinds of rocks on the basis of their appearance and simple physical properties
- describe in simple terms how fossils are formed when things that have lived are trapped within rock
- recognise that soils are made from rocks and organic matter.

**Classifying** - Rocks and soils (discuss how they are different/similar)

**Observing Over Time** - Soil separates into different layers in water

**Post It Note** - Which rock would be suitable to make a statue from? (hardness)

**Researching** - How are fossils formed?

### Plants

Pupils should be taught to:

- identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers
- explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant
- investigate the way in which water is transported within plants
- explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.

**Observation Over Time** - How is water transported in plants?

**Pattern Seeking** - What happens when conditions are changed?

**Researching** - Research the functions of the parts of flowering plants, methods of seed dispersal and pollination.
